DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed July 23, 2009, has been entered. Claims 1-11 have been cancelled and new claims 12-35 have been added.
2. The cancellation of claims 1-11 renders moot the 112, 2nd, 102, and 103 rejections set forth in sections 2, 5, and 7, respectively, of the last Office Action (Non-Final Rejection mailed January 26, 2009).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 12-35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. New independent claims 12, 27, 30, and 35 contain the limitation "curable polymer having a width lesser than a width of the felt layer." The specification as originally filed fails to provide support for the new limitation. While the specification teaches the curable polymer is applied to the felt layer at a penetration depth or thickness of 1-3 mm, which constitutes ¼ or less of the whole thickness of the felt layer (page 6, lines 3-6), this teaching is not equivalent to the curable

Art Unit: 1794

polymer having a *width lesser than the width* of the felt layer. Note width refers to the length of the carpet web (i.e., felt layer) in the cross-machine direction, rather than the thickness of the layers of the carpet web. Hence, claims 12-35 are rejected as containing new matter.

5. Note that a prior art rejection is not made on the current claims in that the prior art does not teach or suggest coating the felt layer of the carpet web with a curable polymer at a *width* less than the width of said felt layer. Additionally, the prior art fails to teach or suggest a corresponding plant for producing the carpet tiles or the corresponding carpet tile product.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

7. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
